Stand-alone app programming AutoCAD also has a number of APIs which are intended to be used directly by non-AutoCAD software such as AutoCAD LT, R2010 and R2013. These APIs enable a user to produce an AutoCAD drawing from within a stand-alone application. Open Source In March 2012, Autodesk made the source code for AutoCAD and Civil 3D publicly available under the Apache 2.0 license. The announcement this time comes from Digitimes, which recently took a look at the Chinese market for tablets and found many of them looking to import their kit over from the US and Europe, presumably to meet demand for the iPad mini. One of the Chinese importers' findings is what the Chinese site claims is a reference to an import tablet that it's trying to sell: the 7.5-inch Dell XPS Tablet P7-20. The report tells us that this isn't the first tablet from Dell and the XPS brand, with the company having been operating under the Digitimes description for some time, and that it will be supported by Dell's last-gen XPS Pad and Keyboard, which we reported on a couple of months ago. This combination is apparently shipping in China and the world's largest electronics market, so it's no surprise that Dell wants to make some hay out of it. The report says that this first device will be sold through PC Mall, one of the few retail operators still allowed to sell imported products, and it'll cost around US\$400. In the face of competition from the iPad mini and Samsung Galaxy Tab series, it isn't too much of a stretch to call this a cheap tablet, but we're told that it will be competing in the Chinese market with devices selling for about US\$250. ca3bfb1094

## What's New in the AutoCAD?

Link and master your existing CadWorks drawings, then bring those links to AutoCAD to use their knowledge for new designs, without any manual preparation. (video: 1:14 min.) Work with CAD-based 2D and 3D CAD software from the same drawing. This will enable you to make changes in your base drawings, and sync those changes with drawings based on those base drawings. (video: 1:22 min.) Create commands to automate CAD data and connections between drawings and track changes in AutoCAD. This lets you better manage your data and control the workflow of CAD-based software, not just within AutoCAD, but also across software applications. (video: 1:30 min.) Create "Dynamic Components," a new tool to help designers work with complex and interdependent sets of data. Dynamic Components are efficient, ready-to-use sub-tools that you can use as building blocks to create objects and layouts in AutoCAD. (video: 1:30 min.) Dynamic Components with Connected Lines: Efficient and reusable CAD components that can be used to create objects, floor plans, and wall and floor sections. (video: 1:36 min.) 3D Stenciling with Shapelab 2: Create and apply non-destructive 3D shaded shapes to 3D parts or a 3D sketch, or to 2D shapes on the screen. 3D Stenciling and the Radial Creation option: Make sure you can work with both radial creation options in the same work space. AutoCAD's radial creation options are not always intuitive. For example, you may think you are drawing a polyline that will be rotated, but the shape that you draw will not rotate as you draw it. Multi-User Drawing: Have someone else edit your drawings for you. This lets you do other tasks while someone else edits your AutoCAD drawings. (video: 2:00 min.) Help your customers with intelligent AutoCAD solutions. Integrate with many of the tools that are critical for your business. With DrawCAD: Use AutoCAD to create drawings that are intuitive, standards-based, and are automatically synchronized to your RDBMS and SharePoint. (video: 2:35 min.) Use CreateCAD to create AutoC
