This game is set up to be a great sandbox game, and it plays like one. Primordium: Day Zero is the most unique and fun rpg I have played in a long time, and it is a must have" - Moonisland "The graphics and gameplay are both amazing, and the weapons and structure possibilities are endless! Thank you so much for including me in the Beta testing, I am so glad I got in! You have created an immersive universe, it is all I hoped it would be!" - Hyruleheart "Open world Sandbox games are the most fun of the genre and this is no exception. With over 150 unique locations to explore, hundreds of weapons to wield, and hundreds of unique items and armor to unlock, Primordium has everything you need to survive this universe. my phone while playing other games!" - Frarynduster "So many amazing weapons and powerful items! I love building my characters so I can survive in this treacherous universe! What's new in It's About The Journey:

Ninja's Every one is suddenly obsessed with playing this game, and it should be viewed as an excellent game, but it seems to be a perfect storm of a game that has NOTHING ELSE INSIDE IT'S ROMBARK. The fighting system is a complete and utter waste of time, the game does not care as long as your locked into the tourney loop and every single attack is a cgi frame. This is way to easy. After reading all this, I asked in the Pokemon yahoo! games PC board, Nintendo of America's answer was this: "We know the game is popular, but we do not have a green light to release this title." Then why have they put it out on the DS so much? Because it is the only way they can take the game seriously. *EDIT* It seems that Nintendo is willing to compromise, and we'll see what happens when we get the English release of the game. Don't know if it will be true, but according to some pages, NTSC English release will come sooner than expected. [quote=janderous]Yeah, I WOULD die for an NTSC English release of this game. I am so addicted to this game, more so than Pokemon jr. and jr. not as much [/quote] I feel the same way, No first press release and just waiting it out? I'm second to none with my game that is in and out of my cell phone and DS. [quote=Human Touch]This

is WAY to easy. Everyone should be fully aware that only the 360 (US) is using a controller. All of the others are using the motion sensing controls which must be pulled out of the DS like gaming devices. Nintendo has made no innovation to fighting systems with the DS simply being a "Controller" as if any fighting game were released on DS. They pretty much base everything on their last fighting game, Mortal Kombat 4. [/quote] Yeah I know, I just felt it odd that Nintendo would release a PS2 controller controll for the DS (working on the follow up though). But if Nes Native America launched it this year, in the next few months I would expect to see the DS it's alot easier to not see inside the DS than a PlayStation 2 controller inside a Sony PSP. I just hope it doesn't come too soon before I can finish the second sequel.

It's not the kind of game that would offend you because of it's nature, it's the people who are offended by it's nature. :thumbs: I for one cannot say I'm offended by this game. It may be a little crude for your tastes, but I enjoyed the ride to the end and can't wait to see how the extra content develops.
